

A woman with dark hair, wearing a yellow sleeveless top and shorts, is posing dynamically with one leg raised. She has a white insulin pump attached to her waist. The background is a solid yellow color with a large, rounded yellow shape behind her.

MAKE DIABETES A SMALLER PART OF LIFE

For people with type 1 diabetes,
ages 2 years and older

omnipod[®]
5
automated insulin
delivery system

LIFE GETS BIGGER.

Pod shown without the necessary adhesive.

when diabetes management becomes smaller.

Multiple daily injection-free. Tube-free. It's automated insulin delivery, simplified.

Dealing with unexpected highs and lows? Not fine. Waking up in the middle of the night? Not necessary. Interrupting the moment for an injection? No more. Status quo is overrated. Good enough is not good enough. You deserve more. Today is the day to try something new.

GET TANGLED UP IN LIFE, NOT TUBES.

It's time for diabetes to take a step back.

Omnipod® 5 lets you work, play, exercise, shower, and swim on your terms, without a second thought. Plus, this sleek, waterproof* and tube-free wearable is discreet and easy to conceal under clothing — so diabetes is only part of the conversation if you want it to be.

Omnipod 5 automatically delivers insulin to help protect against highs and lows, day and night,^{1,2} so you can spend more time living life and less time thinking about diabetes.

*The Pod has an IP28 rating for up to 25 feet for 60 minutes. The Omnipod 5 Controller is not waterproof.

THERE
ARE LOTS
OF PUMPS.
THERE'S
ONLY ONE
OMNIPOD[®] 5.

Omnipod 5 named
the 2023 Patient Choice
Award winner.³

Pod shown without the necessary adhesive.

3

SIMPLE PARTS

Pod and CGMs shown without the necessary adhesive.

Omnipod® 5 Controller or App

Take control of the entire system from a compatible smartphone[†] or use the Controller included with your first prescription.

Pod

Tubeless, wearable and waterproof* with built-in SmartAdjust™ technology — a predictive insulin algorithm — the Pod sits right on your body and helps to keep glucose in range.^{4,5}

Your preferred CGM

In constant communication, your Continuous Glucose Monitor (CGM)[‡] sends glucose values and trends to the Pod to help the system make automated insulin delivery decisions. Omnipod 5 pairs with Dexcom G6 and Dexcom G7.[‡]

[†] For a list of compatible smartphone devices visit omnipod.com/compatibility

^{*} The Pod has an IP28 rating for up to 25 feet for 60 minutes. The Omnipod 5 Controller is not waterproof.

[‡] Dexcom G6 and G7 are sold separately, require a separate prescription and must be used with the Dexcom mobile app to use automated mode. The Dexcom receiver is not compatible.

Want to see
how simple the
Omnipod 5 App is?

Download the
free Omnipod 5
Simulator App on
your smartphone.

**3 EASY STEPS,
EVERY 3 DAYS***

1.

2.

3.

1. Fill

Fill the Pod with up to 200 units of rapid-acting insulin.

2. Place

Place the Pod almost anywhere you would give an insulin injection. The cannula (a small tube) inserts automatically.

3. Tap

Use your Controller or compatible smartphone† to control your insulin delivery with a few taps on a touch screen.

ONE POD

REPLACES UP TO 14 INJECTIONS

*See User Guide for full instructions.

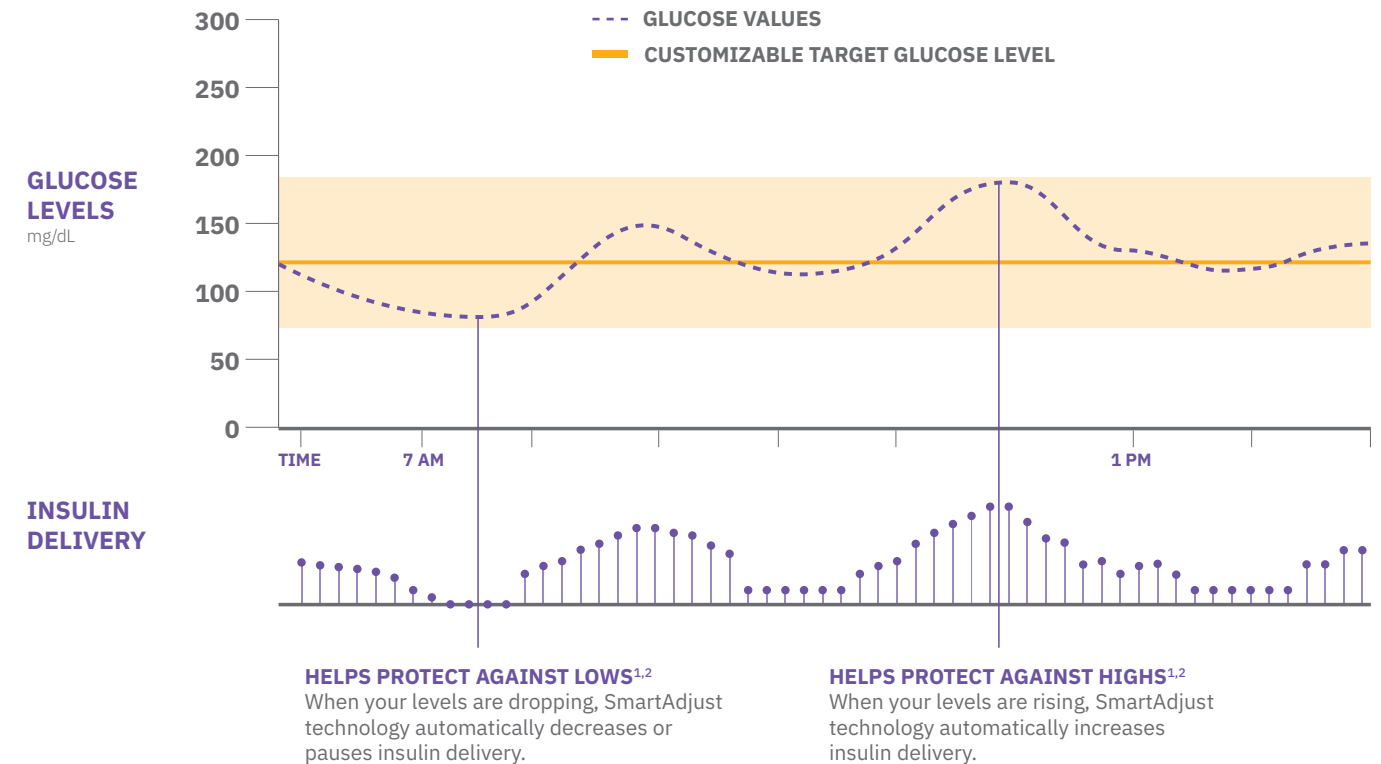

†For a list of compatible smartphone devices visit omnipod.com/compatibility

ALWAYS ADJUSTING, SO YOU DON'T HAVE TO

The Pod has an IP28 rating for up to 25 feet for 60 minutes.
The Omnipod® 5 Controller is not waterproof.

SmartAdjust™ technology is the brains behind the Omnipod 5 System, helping to protect against highs and lows.^{1,2} The system predicts where glucose values will be in 60 minutes and automatically increases, decreases, or pauses insulin every 5 minutes based on your CGM value and trend. Bolus doses can be given for meals using the Omnipod 5 App or Controller.

SmartAdjust technology: How it works

SAY HELLO TO RESTFUL NIGHTS.

Omnipod® 5 automatically adjusts your insulin levels every 5 minutes, even overnight, to help keep glucose in range.^{4,5} It's the system that never sleeps, so you can start dreaming big.

MEALTIME MATH, DONE FOR YOU.

The SmartBolus Calculator makes it simple to determine the right amount of insulin for meals and snacks. It uses your CGM value and trend along with carbohydrate amount to calculate a mealtime dose — no need for guessing.

TECHNOLOGY, MADE SIMPLE FOR YOU

GET GOING WITH ACTIVITY FEATURE

When turned on, Activity feature reduces insulin delivery for times when glucose typically goes low, like exercising. Whether hitting your step goals, the gym, or the yoga mat, Omnipod® 5 makes the balancing act easier.

CONTROLLED BY A COMPATIBLE SMARTPHONE

Take full control of the system at any time with just a few taps. Bolusing for a meal, enabling Activity feature and even changing your Pod looks just like sending a text with the Omnipod 5 App on your compatible smartphone.[†]

[†]For a list of compatible smartphone devices visit omnipod.com/compatibility

OMNIPOD[®] 5
IS SMALL.
YET ITS
IMPACT IS

HUGE

Hundreds of thousands of people with diabetes trust Omnipod 5 because it helps take their minds off insulin management and gives them more control over both their lives and their diabetes.

“Omnipod 5 gives you the option to control diabetes where you are still in charge.”

DWIGHT
Omnipod 5 user

“Some of the decisions I have to make daily regarding diabetes, the device handles it all in the background.”

ALVIN
Omnipod 5 user

“The Omnipod 5 has dramatically taken the focus from my diabetes to me focusing on my life, my job, my friends, and my relationships.”

MORGAN
Omnipod 5 user

TODAY'S THE DAY TO TRY SOMETHING NEW.

Ready to put multiple daily injections and bulky pumps behind you? We've taken away every barrier we can between you and a life less occupied by diabetes.

Affordability

Unlike traditional insulin pumps, Omnipod® 5 is available through the pharmacy so there are no high upfront costs to get started. The Controller is provided at no cost with your first prescription and most people pay less than \$50 per month for ongoing supplies.⁵

Our team will take a close look at your benefits to see what your insurance will cover and determine your estimated monthly copay.

Convenience

Easily pick up your Omnipod supplies where you get your other prescriptions, like insulin.

24/7 Support

Our team of certified Omnipod trainers will help you get started and our Customer Care team is available 24/7 to provide the support you need to succeed.

 4. Study in 240 people with T1D aged 6 - 70 years involving 2 weeks standard diabetes therapy followed by 3 months Omnipod 5 use in Automated Mode. Average day time (6AM-12AM) in Target Glucose range (from CGM) in adults/adolescents and children for standard therapy vs. Omnipod 5 = 64.8% vs. 72.5%; 51.5% vs. 64.6%. Average overnight (12AM-6AM) in Target Glucose range (from CGM) in adults/adolescents and children for standard therapy vs. Omnipod 5 = 64.3% vs. 78.1%; 55.3% vs. 78.1%. Brown et al. Diabetes Care (2021).
 5. Study in 80 people with T1D aged 2 - 5.9 yrs involving 2 weeks standard diabetes therapy followed by 3 months Omnipod 5 use in Automated Mode. Average time in Target Glucose range (6AM-12AM) from CGM in standard therapy vs. Omnipod 5 = 58.2% vs. 64.3%. Average time in Target Glucose range (12AM-6AM) from CGM in standard therapy vs. Omnipod 5 = 60.6% vs 82.4%. Sherr JL, et al. Diabetes Care (2022).

Indications for use

The Omnipod 5 ACE Pump (Pod) is intended for the subcutaneous delivery of insulin, at set and variable rates, for the management of diabetes mellitus in persons requiring insulin. The Omnipod 5 ACE Pump is able to reliably and securely communicate with compatible, digitally connected devices, including automated insulin dosing software, to receive, execute, and confirm commands from these devices. The Omnipod 5 ACE Pump is intended for single patient, home use and requires a prescription.

SmartAdjust™ technology is intended for use with compatible integrated continuous glucose monitors (iCGM) and alternate controller enabled (ACE) pumps to automatically increase, decrease, and pause delivery of insulin based on current and predicted glucose values. SmartAdjust technology is intended for the management of type 1 diabetes mellitus in persons 2 years of age and older. SmartAdjust technology is intended for single patient use and requires a prescription.

The Omnipod 5 SmartBolus Calculator is software intended for the management of diabetes in persons aged 2 and older requiring rapid-acting U-100 insulin. The Omnipod 5 SmartBolus Calculator calculates a suggested bolus dose based on user-entered carbohydrates, most recent sensor glucose value (or blood glucose reading if using fingerstick), rate of change of the sensor glucose (if applicable), insulin on board (IOB), and programmable correction factor, insulin to carbohydrate ratio, and target glucose value. The Omnipod 5 SmartBolus Calculator is intended for single patient, home use and requires a prescription.

The Omnipod® 5 System is NOT recommended for people who:

- are unable to monitor glucose as recommended by their healthcare provider
- are unable to maintain contact with their healthcare provider
- are unable to use the Omnipod 5 System according to instructions
- are taking hydroxyurea as it could lead to falsely elevated CGM values and result in over-delivery of insulin that can lead to severe hypoglycemia
- do NOT have adequate hearing and/or vision to allow recognition of all functions of the Omnipod 5 System, including alerts, alarms, and reminders

Device components including the Pod, CGM transmitter, and CGM sensor must be removed before Magnetic Resonance Imaging (MRI), Computed Tomography (CT) scan, or diathermy treatment. In addition, the Controller and smartphone should be placed outside of the procedure room. Exposure to MRI, CT, or diathermy treatment can damage the components.

Warning: SmartAdjust™ technology should NOT be used by anyone under the age of 2 years old. SmartAdjust technology should also NOT be used in people who require less than 5 units of insulin per day, as the safety of the technology has not been evaluated in this population.

Compatible insulins

The Omnipod 5 ACE Pump (Pod) is compatible with the following U-100 insulins: NovoLog®, Humalog®, and Admelog®

SmartAdjust technology is compatible with the following U-100 insulins: NovoLog®, Humalog®, and Admelog®

The Omnipod 5 SmartBolus Calculator is compatible with the following U-100 insulins: NovoLog®, Humalog®, and Admelog®

OMNIPOD® 5 SIMPLIFY LIFE®

The Pod has an IP28 rating for up to 25 feet for 60 minutes. The Omnipod 5 Controller is not waterproof.
