

Confirmation of PDM Use

To whom it may concern,

I hereby confirm that _____ born _____ has insulin-dependent diabetes and is using the Omnipod DASH® Insulin Pump System to manage their diabetes.

The Omnipod DASH® System Personal Diabetes Manager (PDM) is a handheld device that is not a mobile phone.

It is part of a 2-piece system that controls and monitors the Omnipod DASH® Pod’s operations using wireless technology. Omnipod DASH® Pods operate with the Omnipod DASH® PDM to deliver daily insulin requirements.

The Omnipod DASH® PDM is not able to take photographs. Its sole purpose is to support the owner’s diabetes management by the crucial delivery of insulin at all times, and as such, it must always remain with the above-named person.
