

8 QUESTIONS TO ASK YOUR DOCTOR

about the Omnipod DASH™ Insulin Management System for people with type 2 diabetes on MDI or a tubed pump.

You may already have heard a lot about insulin pumps, especially the tubeless insulin pump known as the Omnipod DASH™ Insulin Management System.

Have you wondered if this is a product that might work for you?

Here are eight questions that you could review with your health care provider to learn more.

- 1) How can pumps like the Omnipod DASH™ System have an impact on my A1C and blood glucose levels?
- 2) Would I be able to eliminate the multiple injections that I now take every day?
- 3) Would the Omnipod DASH™ System make it easier for me to calculate mealtime insulin delivery?
- 4) Is there a benefit to a continuous flow of insulin, as opposed to injections spaced throughout the day?
- 5) Do other patients using pumps find that it's easier to be discreet and private about their diabetes, as opposed to patients who still take injections?
- 6) What do other patients say about insulin pumps in general?
- 7) Would the Omnipod DASH™ System make it easier for me to track my numbers and share with loved ones or my care team?*
- 8) What do you, as my doctor, believe are the important considerations in deciding about the Omnipod DASH™ System?
