Talk to your doctor about Omnipod 5 and Medicare Part D

Omnipod 5 is the #1 most prescribed Automated Insulin Delivery system through Medicare Part D.*

Tired of daily insulin injections? Omnipod 5 is a small, tube-free and waterproof† Pod that communicates with your CGM/Sensor to automatically adjust insulin delivery based on your insulin needs and sensor trends.

Bring or send this to your Doctor to kickstart a conversation on how Omnipod 5 may simplify your life.

Questions	Why Omnipod 5
<input type="checkbox"/> Does Omnipod 5 have broad Medicare coverage?	Yes, Omnipod 5 has broad coverage under Medicare Part D‡. To check your coverage and find out what your copay might be, call our Omnipod Medicare Specialists at: 1-800-591-9948.
<input type="checkbox"/> Will Omnipod 5 help protect against highs and lows?	Connected to your CGM/Sensor, Omnipod 5 automatically adjusts by increasing, decreasing or pausing insulin delivery every 5 minutes to help protect against highs and lows, day and night. ¹⁻³
<input type="checkbox"/> Who can use Omnipod 5?	Omnipod 5 is cleared for people with type 1 diabetes, aged 2+ and people with type 2 diabetes, aged 18+.
<input type="checkbox"/> What CGM does Omnipod 5 work with?	Omnipod 5 currently integrates with Dexcom G6, Dexcom G7 and the FreeStyle Libre 2 Plus Sensor. Sensors are sold separately and require a separate prescription.
<input type="checkbox"/> Can I control Omnipod 5 with a smartphone?	You can take full control of the Pod from the Omnipod 5 app on your compatible Android and iPhone smartphone ⁵ . Additionally, you can also use the free Controller, included with your first prescription of Omnipod 5.

1. Brown et al. Diabetes Care (2021). Study in 240 people with T1D aged 6 - 70 years involving 2 weeks standard diabetes therapy followed by 3 months Omnipod 5 use in Automated Mode. Average overnight time (12AM-6AM) with high blood glucose in adults/adolescents and children for standard therapy vs. Omnipod 5 = 32.1% vs. 20.7%; 42.2% vs. 20.7%. Average day time (6AM-12AM) with high blood glucose in adults/adolescents and children for standard therapy vs. Omnipod 5 = 32.6% vs. 26.1%; 46.4% vs. 33.4%. Average overnight time (12AM-6AM) with low blood glucose in adults/adolescents and children for standard therapy vs. Omnipod 5 = 3.6% vs. 1.2%; 2.5% vs. 1.2%. Average day time (6AM-12AM) with low blood glucose in adults/adolescents and children for standard therapy vs. Omnipod 5 = 2.6% vs. 1.4%; 2.1% vs. 2.0%.

2. Sherr J, et al. Diabetes Care (2022). Study in 80 children with T1D aged 2 to 5.9 years involving 2 weeks standard diabetes therapy followed by 3 months Omnipod 5 use in Automated Mode. Average overnight time (12AM-6AM) with high blood glucose in children for standard therapy vs. Omnipod 5 = 38.4% vs. 16.9%. Average day time (6AM-12AM) with high blood glucose in children for standard therapy vs. Omnipod 5 = 39.7% vs. 33.7%. Average overnight time (12AM-6AM) with low blood glucose in children for standard therapy vs. Omnipod 5 = 3.4% vs. 2.1%. Average day time (6AM-12AM) with low blood glucose in children for standard therapy vs. Omnipod 5 = 3.4% vs. 2.6%.

3. Pasquel FJ, et al. JAMA Network Open (2025). Prospective pivotal trial in 305 participants with T2D aged 18-75 yrs. Study included a 14-day standard therapy (ST) phase followed by a 13-week Omnipod 5 hybrid closed-loop phase. Mean overnight time >180 mg/dL (12AM-6AM) as measured by CGM: ST = 50%, 3-mo Omnipod 5 = 30%. Mean daytime >180 mg/dL (6AM-12AM) as measured by CGM: ST = 55%, 3-mo Omnipod 5 = 36%. Mean overnight time in <70 mg/dL (12AM-6AM) as measured by CGM: ST = 0.10%, 3-mo Omnipod 5 = 0.22%. Mean daytime <70 mg/dL (6AM-12AM) as measured by CGM: ST = 0.16%, 3-mo Omnipod 5 = 0.17%. Statistical testing not done to assess significance of change between ST phase and Omnipod 5 System phase.

Helpful info for your Doctor

SIMPLE TO ACCESS

Give your patients a simple way to try, start, and stay on Omnipod® 5.

Omnipod 5 is the only tube-free AID system covered under Medicare part D **without a C-peptide test**

Simple pharmacy access

Patients can get Pods when they pick up their insulin

INSTRUCTIONS FOR PRESCRIBING OMNIPOD 5 WITH PATIENTS' PREFERRED SENSORS:

Insulet • 100 Nagog Park, Acton, MA 01720 • 1-800-591-3455 • omnipod.com

The Omnipod 5 Automated Insulin Delivery System is indicated for use by individuals with type 1 diabetes mellitus in persons 2 years of age and older and type 2 diabetes mellitus in persons 18 years of age and older. The Omnipod 5 System is intended for single patient, home use and requires a prescription. The Omnipod 5 System is compatible with the following U-100 insulins: NovoLog®, Humalog®, and Admelog®.

Refer to the Omnipod 5 Automated Insulin Delivery System User Guide and www.omnipod.com/safety for complete safety information including indications, contraindications, warnings, cautions, and instructions. Warning: DO NOT start to use the Omnipod 5 System or change settings without adequate training and guidance from a healthcare provider. Initiating and adjusting settings incorrectly can result in over-delivery or under-delivery of insulin, which could lead to hypoglycemia or hyperglycemia. Warning: Do not use SmartAdjust technology for people under the age of 2 or who require less than 5U of insulin per day.
