New, Simple and Discreet way to deliver your insulin

The Omnipod DASH® System is the new, simple, tubeless and discreet way to deliver your insulin and can help you to live life without constantly worrying about your diabetes. The familiar, smartphone-like technology is easy to use and disappears into your everyday life.

The Pod has an IP28 rating for up to 7.6 metres for 60 minutes.
The PDM is not waterproof.

Important Safety Information:

The Omnipod DASH® Insulin Management System is intended for subcutaneous delivery of insulin at set and variable rates for the management of diabetes mellitus in persons requiring insulin. The Omnipod DASH® System has been tested and found to be safe for use with the following U-100 insulin: Novolog®/NovoRapid®, Humalog®, Fiasp®, Admelog® or Apidra®. Refer to the Omnipod DASH® Insulin Management System User Guide for complete safety information including indications, contraindications, warnings, cautions, and instructions.

*Calls may be monitored and recorded for quality purposes. Calls to 0800 numbers are free from local landlines, but networks may charge for these calls.

PODDER™ SINCE 2017

The Omnipod DASH®
Insulin Management System

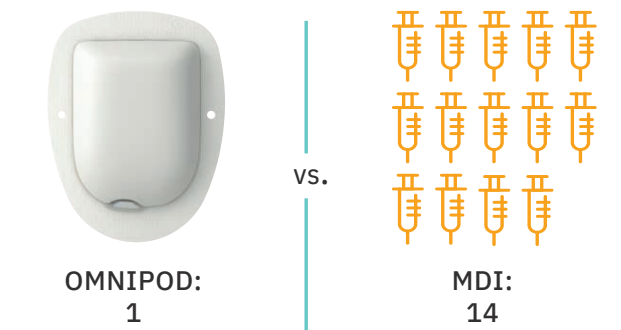

Freedom to live your life with Pod Therapy

SIMPLIFY INSULIN DELIVERY. SIMPLIFY LIFE™

Patrick D.
PODDER™ SINCE 2014

Live life uninterrupted

- > Fewer injections, fewer daily interruptions - Average number of injections required every 3 days (MDI: ~4.5 per day).
- > Consistent, hands-free insertion - No need to see or touch the insertion needle.
- > 3 days non-stop insulin delivery*

Getting started

Once fully programmed, the Omnipod DASH® System can start delivering your insulin with just 3 simple steps.

- 1. Fill the Pod**

Fill Pod with up to 200 units of insulin.
- 2. Apply the Pod**

The tubeless Pod can be worn almost anywhere an injection would be administered.
- 3. Tap 'Start' on the PDM**

The small, flexible cannula inserts automatically; you'll never see it and barely feel it.

Simple and discreet

- 1 A Tubeless, Waterproof* Pod**

Free yourself from daily injections, tubing hassles, and wardrobe compromises.
- 2 A Touch-Screen Personal Diabetes Manager (PDM)**

Discreet insulin delivery with a few finger taps.

Easy to use, easy to love

New, modern, colour touch-screen PDM features an intuitive interface. Educational prompts walk you through common tasks and functions to help you manage your diabetes.

- Tubeless**

Move freely, wear what you want, and play sports without any concern of a tube getting in the way. The Omnipod DASH® Pod is small, lightweight and discreet.
- Waterproof****

Swim, shower, and do more without having to remove your Pod, helping you live your life.
- Bluetooth® wireless technology**

With the Omnipod DASH® PDM, you can remotely† make adjustments to your insulin dose based on activity level and meal choices. It's just more confidence for you.
- Flexible & personalised**

You can wear your Pod almost anywhere you would give yourself an injection. You have the ability to set various Presets on the Omnipod DASH® PDM to establish favourites, tag your activities and personalise insulin delivery based on your daily routine.

The freedom to enjoy your favourite activities uninterrupted...

Please note that you should speak to your healthcare provider to assess your suitability for the Omnipod DASH® Insulin Management System.

*Up to 72 hours of continuous insulin delivery.
**The Pod has an IP28 rating for up to 7.6 metres for 60 minutes. The PDM is not waterproof.
†Within 1.5 metres during normal operation.
